## EDUCATION

NQF 5 Higher Certificate in

System Development:

At Damelin College:

Graduated December 2023

## SUMMARY

A passionate and dedicated Web Developer, Python Developer, and Software Tester with a broad range of technical skills and a focus on delivering high-quality software solutions. I have hands-on experience in web development, utilizing HTML, CSS, and JavaScript to build dynamic, responsive websites, while also leveraging back-end technologies like Python, Java, C#, and Visual Basic for robust application development.

In software testing, I specialize in automated testing with Jest, ensuring that code is reliable, scalable, and bug-free. I am currently preparing to complete my ISTQB certification to further enhance my testing expertise and formalize my understanding of industry best practices. My technical background is complemented by a strong attention to detail, problem-solving skills, and a drive to stay updated on the latest tools and trends in tech.

As a versatile developer with experience across multiple programming languages, I thrive in fast-paced environments where continuous learning and innovation are essential. Whether developing web applications or ensuring quality through rigorous testing, I am committed to producing results that meet both user needs and business goals.

## WORKEXPERIENCE

**Freelance web developer**

**(2022-present)**

As a freelance web developer on Fiverr and Upwork, I've successfully worked with a diverse client base, addressing a wide range of web development needs. My responsibilities included:

- Building and maintaining websites using HTML, CSS, and JavaScript, ensuring responsive designs and seamless user experiences.
- Resolving hosting issues, including server setup, domain configurations, and troubleshooting website performance problems.
- Customizing and optimizing existing websites to meet client requirements, from front-end styling to back-end functionality.
- Developing interactive features using JavaScript to enhance user engagement and improve functionality.

## LANGUAGES

English	<div></div>
Xitsonga	<div></div>

### South African University Application Tracker

Came third in the school hackathon for creating a web app that tracks user university applications:

Features worked on:

- APS Calculator
- Home page Log-In
- AI Chatbot
- 2 factor authorization

### CodeTribe Web Development Bootcamp

Was selected to attend the CodeTribe Sponsored bootcamp.

Things learnt:

- HTML
- JavaScript
- CSS (SASS)
- Firebase hosting
